

Dino Dash Arrays game

Included in this pack

- Dino Dash board
- Plates and counters cutouts
- Number cards

What you'll need

- A partner
- Laminator (optional) - We recommend laminating the game board and plates to make it reusable.

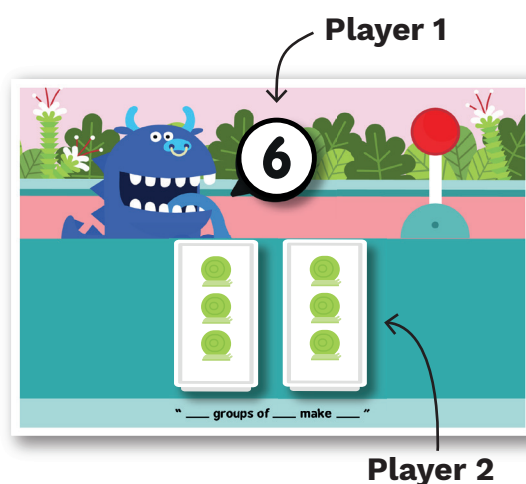

Instructions

1. Print the game board.
2. Guillotine or cut out the number cards and plates (this can be cut straight for speed or neatly around the circles). We've left some blank if you want your own numbers too.

To play:

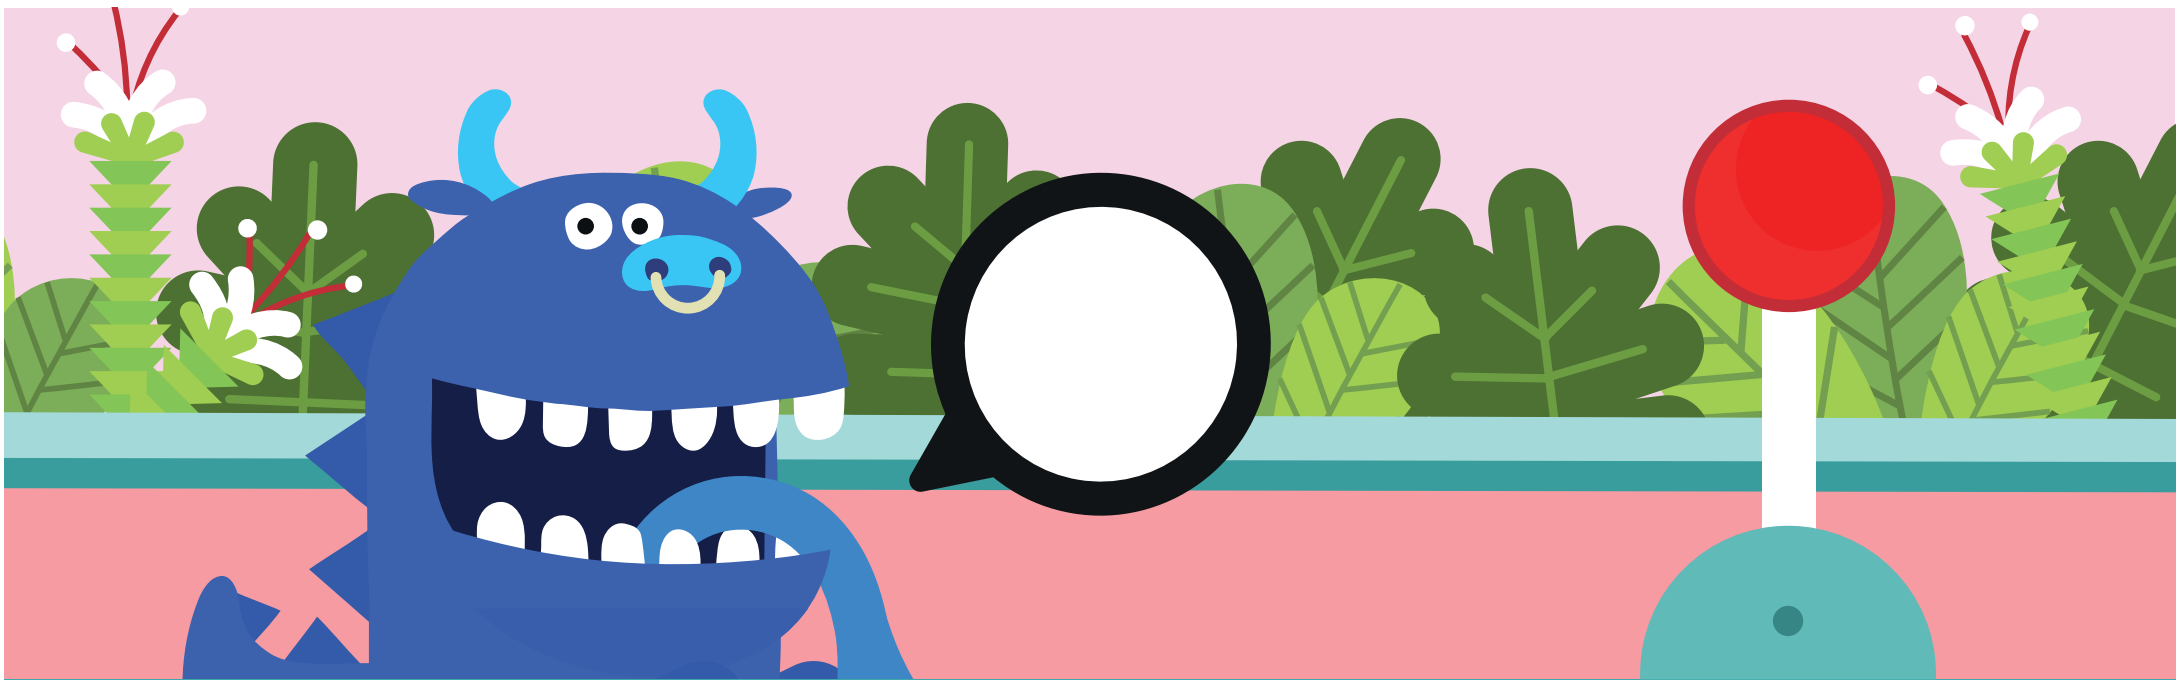

1. Get into partners.
2. The first player shuffles the number cards and chooses one to place at the top of the Dino Dash Board.
3. The second player needs to choose the plates to serve the hungry dino cow the correct number of snails. Tap the red lever to show you are done.
4. The first player adds the plates together to check the number is correct, using the sentence frame to help. If it's correct... chomp! One happy dino cow and the player wins a point!
5. If not, help each other to fix it. Well done!
6. Take turns to be the one choosing the number.

TIP: You may have to go off the page for some sets of arrays!

"2 groups of 3 make 6"

“ ____ groups of ____ make ____ ”
